

Getting started with FilmStar MEASURE

- Select FilmStar and NOT Scanraq when installing for the first time.
- Install FilmStar before attaching the USB Security ID Module.
- There are seven versions of MEASURE and four supplemental servers; please select only versions compatible with your instrument(s).

This table follows the same order as the installer.

1	Agilent (HP) 8453 {Mhp8453.exe}	<ul style="list-style-type: none"> • HPIB interface required
2	PE Lambda 2-950, IR 580-983, Servers 2a-2d {Mpe983.exe}	<ul style="list-style-type: none"> • If no URA, recommended for Lambda 650-950
2a	+ Ocean Optics Server	<ul style="list-style-type: none"> • OmniDriver 1.6 required. Please refer to www.ftgsoftware.com/issues_oceanoptics.htm
2b	+ PE Spectrum 100 Server	<ul style="list-style-type: none"> • PE Spectrum Express required
2c	+ PE Spectrum GX/2000 Server	<ul style="list-style-type: none"> • PE Spectrum (16-bit) required
2d	+ PE Spectrum One Server	<ul style="list-style-type: none"> • PE Spectrum (32-bit) required
3	Varian Cary {M Cary5.exe}	<ul style="list-style-type: none"> • Minimum installation Cary WinUV (System + Scan application) required
4	Hitachi U-3210/3410 {Mh3410.exe}	<ul style="list-style-type: none"> • No support for newer instruments
5	PE Lambda 650-950 with URA {Mpe950.exe}	<ul style="list-style-type: none"> • Requires UV Winlab 6 with URA driver
6	PE Lambda 18/19 {Mpe19AX.exe}	<ul style="list-style-type: none"> • Requires Lambda AX PCI card and drivers; • Installation instructions at www.ftgsoftware.com/issues_lambda19.htm • PE ISA Lambda 19 board not supported
7	PE Lambda 1050 (URA/TDM support) {Mpe1050.exe}	<ul style="list-style-type: none"> • Requires UV Winlab 6 with URA and TDM drivers installed

After starting MEASURE, open a Scan Method file appropriate for the spectrophotometer you are using. When ready to actually acquire data, don't forget to turn off Test Mode in File...Configuration...Preferences.

Updates may be downloaded from our web site. Support e-mails include licensing and installation passwords at the bottom. **Bookmark <http://ftgsoftware.com/updates.htm> so you can easily get to our support pages.** Alternatively, if your FilmStar computer accesses the Internet, use the links in the Help menu. You can print manuals available in Adobe PDF format. *Since the manual is the same as online help, please consider the environment before printing.*

In addition to its Windows point and click interface, FilmStar MEASURE includes development modules BASIC, Workbook, FSPlot, Database and Report Generator. The modules are described in on-line help and illustrated in supplied examples.

Contact FTG Software if you have any problems installing or running MEASURE. Also, please keep us informed if your e-mail address changes and if there other users who should receive support e-mails.

We suggest that you do not install FilmStar database support until you understand exactly what it does (see <http://ftgsoftware.com/database.htm>). Install FileMaker support (FM8Setup.exe) after installing both FilmStar and FileMaker Pro Version 8-11. If you don't have FileMaker Pro and want to see how it works (with some restricted functionality) install <http://ftgsoftware.com/files/fmrtsetup.exe>.
